- Avoid heat loss and fit every cup with our adjustable spout

### Ease of cleaning and maintaining

- Fully automatic rinsing and de-scaling
- Easy cleaning thanks to removable brewing group
- Dishwasher-safe drip tray and servings container

Saeco

# Highlights

### 100% ceramic grinders

This espresso machine is equipped 100% ceramic grinders. Saeco uses ceramic grinders because of their consistent grind without overheating the coffee bean for an impeccable espresso. Ceramic also ensures long-lasting performance and a totally silent operation.

### 5 step adjustable grinders

Different coffee blends require different levels of granularity for the full flavor to unfold. The grind granularity of this espresso machine can be adjusted in 5 settings, from the finest grind, for a full bodied espresso, to the coarsest, for a lighter café crème.

### Adjustable spout

The adjustable spout on our espresso machines will fit every cup and thus prevents the coffee splashing or cooling down while pouring in your cup. This way your espresso is always served at the right temperature while maintaining a clean machine.

### Dishwasher-safe drip tray-part

You can comfortably put the drip tray and servings container in your dishwashe, giving them a perfect time-saving clean.

### Fully automatic rinsing

Easy maintenance, long-lasting performance and always the best result in the cup are ensured thanks to our fully automated rinsing and de-scaling program.

### Saves your coffee settings

You will always get a perfect cup of espresso brewed just for you, according to your personal preference, thanks to our innovative memo function to adjust the coffee length, strength and temperature. Enjoy a superb coffee drink in your favorite cup with just the press of a button.

### Automatic milk frother

Preparing a tasty cappuccino is easy with this Saeco espresso machine thanks to the new, patented automatic milk frother with its cyclonic chamber. The milk frother, which baristas also call “cappuccinatore”, will draw milk directly from a milk carton or jug and froth it automatically, dispensing it directly into your cup. And thanks to the exclusive cyclonic chamber, a constant flow of milk without any splashing is guaranteed.

### Removable brewing group

The brewing group, a Saeco invention, is the heart of our espresso machines, ensuring automation. The brewing group is, depending on the model, easily accessible from the front or side. It can be removed effortlessly for easily cleaning by rinsing under the tap ensuring maximum hygene.
